## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to a system for capturing images, classified in class 342, subclass 147.
  - II. Claims 7-18, drawn to system for displaying and making measurement, classified in class 345, subclass 625.
  - III. Claims 19-26, drawn to taking measurement using an input device, classified in class 715, subclass 700.
  - IV. Claims 27-32, drawn to capturing oblique images of an area of interest, classified in class 382, subclass 106.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination II has separate utility such as image display and analysis software. Moreover, subcombination III has separate utility such as measurement using an input device. As for subcombination IV has separate utility such as capturing images and subdividing the area of interest. See MPEP § 806.05(d).

Art Unit: 2624

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nancy Bitar whose telephone number is 571-270-1041. The examiner can normally be reached on Mon-Fri (7:30a.m. to 5:00pm).
